What is an Echo Chamber?

An echo chamber is when you only see or hear opinions that match your own, again and again, as if everyone agrees. It's like shouting into a tunnel and only hearing your own voice come back.

Why do Echo Chambers happen?

- Social Media shows you content you already like or agree with.
- You might follow only certain people or pages with similar views.
- Algorithms try to keep you watching by showing you things you 'want' to see.

FACTS

does bigfoot really exist?

- **REAL SASQUATCH! CAUGHT ON CAMERA!**
- Scientists **STUNNED** by New Bigfoot Evidence!!
- Sasquatch DNA **TESTED**. The results are...

What's the big deal?

Being in an echo chamber can:

- Make it harder to understand other people's ideas or learn new ideas.
- Make you think people who disagree with you are 'wrong' or 'bad'.
- Trap you in a filter bubble (a kind of invisible information bias bubble with a singular or narrow perspective.)
- Block you from learning new facts

Algorithm puts you with others who share similar backgrounds, interests, beliefs and values.

Spotting an Echo Chamber

Watch for these signs!

- No facts or proof just strong feelings
- Posts that mock or attack the 'other side'
- Everyone agrees all the time
- You don't see other opinions anymore

<https://www.Sasquatch-Social.com>

Bigfoot Bill:

They still don't think we exist!!

Sue Sasquatch:

They can't handle our good looks.

Ben:

We don't need them!!

How to see past Echo Chambers

- Follow people with different opinions, cultures, or backgrounds
- Ask questions like:
 - 'Is there another way to see this?'
 - 'What do people on the other side think?'
- Think before sharing, don't just repost
- Use credible sources
